Full-Chain Cyber Security Audit Report

Generated: March 13, 2026 22:32:39 UTC

CONFIDENTIAL - SOC AUDIT DOCUMENTATION

1. EXECUTIVE SUMMARY

Full threat detection and response lifecycle against log source 'zap_report_20260206-123234.json'. Tool 1 ingested 26 events (0 rejected), identifying 1 MITRE ATT&CK technique(s). Tool 2 reconstructed 5 behavioral session(s). Tool 3 generated 5 attack trajectory forecast(s). Tool 4 derived 1 targeted remediation action(s). Tool 6 updated the governance trust model and audit ledger.

2. TOOL 1 - EVENT INGESTION & INTELLIGENCE

Log Source:

zap_report_20260206-123234.json

26

0

2026-03-13T19:31:32.887203+00:00

C:\Users\cisco\Documents\pushing_Ni... edictpath-AI\Tool1\data\output

MITRE ATT&CK Techniques Detected:

T1190 - 26 event(s)

Severity Distribution:

MEDIUM 26 event(s)

Top Observed Hosts:

https://learning-digitech.vercel.app/ - 9 event(s)

https://learning-digitech.vercel.app/sitemap.xml - 7 event(s)

https://learning-digitech.vercel.app/robots.txt - 4 event(s)

https://learning-digitech.vercel.app/assets/index-bkkz15b8.css - 3 event(s)

https://learning-digitech.vercel.app/assets/index-d1dhjboy.js - 3 event(s)

3. TOOL 2 - BEHAVIORAL SESSION RECONSTRUCTION

Total Sessions:

5

Session: Activity on <https://learning-digitech.vercel.app/>

Risk: High Anomaly Score: 84.47

Blast Radius: <https://learning-digitech.vercel.app/>

Summary: URGENT: Attacker has successfully achieved persistence or internal lateral movement. Data access is likely imminent.

Session: Activity on <https://learning-digitech.vercel.app/assets/index-bkkz15b8.css>

Risk: Medium Anomaly Score: 70.00

Blast Radius: <https://learning-digitech.vercel.app/assets/index-bkkz15b8.css>

Summary: URGENT: Attacker has successfully achieved persistence or internal lateral movement. Data access is likely imminent.

Session: Activity on <https://learning-digitech.vercel.app/assets/index-d1dhjboy.js>

Risk: Medium Anomaly Score: 70.00

Blast Radius: <https://learning-digitech.vercel.app/assets/index-d1dhjboy.js>

Summary: URGENT: Attacker has successfully achieved persistence or internal lateral movement. Data access is likely imminent.

Session: Activity on <https://learning-digitech.vercel.app/robots.txt>

Risk: High Anomaly Score: 71.14

Blast Radius: <https://learning-digitech.vercel.app/robots.txt>

Summary: URGENT: Attacker has successfully achieved persistence or internal lateral movement. Data access is likely imminent.

Session: Activity on <https://learning-digitech.vercel.app/sitemap.xml>

Risk: High Anomaly Score: 83.42

Blast Radius: <https://learning-digitech.vercel.app/sitemap.xml>

Summary: URGENT: Attacker has successfully achieved persistence or internal lateral movement. Data access is likely imminent.

4. TOOL 3 - PREDICTIVE ATTACK TRAJECTORY

Session: Activity on <https://learning-digitech.vercel.app/>

Techniques: T1190, T1505, T1078, T1046, T1059, T1562, T1592, T1204

Host Scope: <https://learning-digitech.vercel.app/>

Vulnerabilities: CWE-615, CWE-525, CWE-78, CWE-89, CWE-1021, CWE-693, CWE-434, CWE-20, CWE-264

Model Confidence: 97%

Narrative: CRITICAL ALERT: Session 'Activity on <https://learning-digitech.vercel.app/>' shows a high-velocity, confirmed attack sequence. The specific weaknesses identified (CWE-615, CWE-525, CWE-78) provide the technical logical bridges for the projected trajectory. An attacker exploiting these vulnerabilities is projected to pivot to 'Exploit Public-Facing Application' next (50% probability).

Projected Attack Scenarios:

[Medium] 50% probability - Exploit Public-Facing Application

[Medium] 30% probability - Network Service Discovery

[Medium] 30% probability - Exploit Public-Facing Application -> Command and Scripting Interpreter

Session: Activity on <https://learning-digitech.vercel.app/assets/index-bkkz15b8.css>

Techniques: T1190, T1505, T1078, T1046, T1059, T1562

Host Scope: <https://learning-digitech.vercel.app/assets/index-bkkz15b8.css>

Vulnerabilities: CWE-525, CWE-78, CWE-89, CWE-693, CWE-434, CWE-20, CWE-264

Model Confidence: 93%

Narrative: CRITICAL ALERT: Session 'Activity on <https://learning-digitech.vercel.app/assets/index-bkkz15b8.css>' shows a high-velocity, confirmed attack sequence. The specific weaknesses identified (CWE-525, CWE-78, CWE-89) provide the technical logical bridges for the projected trajectory. An attacker exploiting these vulnerabilities is projected to pivot to 'OS Credential Dumping' next (30% probability).

Projected Attack Scenarios:

- [High] 30% probability - OS Credential Dumping
- [Medium] 30% probability - Network Service Discovery
- [Medium] 20% probability - Archive Collected Data

Session: Activity on <https://learning-digitech.vercel.app/assets/index-d1dhjboy.js>

Techniques: T1190, T1505, T1078, T1059, T1562, T1592

Host Scope: <https://learning-digitech.vercel.app/assets/index-d1dhjboy.js>

Vulnerabilities: CWE-615, CWE-78, CWE-89, CWE-693, CWE-434, CWE-20, CWE-264

Model Confidence: 97%

Narrative: CRITICAL ALERT: Session 'Activity on <https://learning-digitech.vercel.app/assets/index-d1dhjboy.js>' shows a high-velocity, confirmed attack sequence. The specific weaknesses identified (CWE-615, CWE-78, CWE-89) provide the technical logical bridges for the projected trajectory. An attacker exploiting these vulnerabilities is projected to pivot to 'Exploit Public-Facing Application' next (50% probability).

Projected Attack Scenarios:

- [Medium] 50% probability - Exploit Public-Facing Application
- [Medium] 30% probability - Network Service Discovery
- [Medium] 30% probability - Exploit Public-Facing Application -> Command and Scripting Interpreter

Session: Activity on <https://learning-digitech.vercel.app/robots.txt>

Techniques: T1190, T1505, T1078, T1046, T1059, T1562

Host Scope: <https://learning-digitech.vercel.app/robots.txt>

Vulnerabilities: CWE-525, CWE-78, CWE-89, CWE-693, CWE-434, CWE-20, CWE-264

Model Confidence: 93%

5. TOOL 4 - ADAPTIVE RESPONSE DECISIONS

Decision 1: Activity on https://learning-digitech.vercel.app/

Urgency: Critical Confidence: 100%

Strategy: Disruptive mitigation strategy for Activity on https://learning-digitech.vercel.app/ has been initiated as a countermeasure to a 50% probability threat. The selected action, 'Isolate Host', targets Host 'learning-digitech.vercel.app' with an estimated risk reduction of 49.5% across the predicted trajectory. Manual authorization is required before execution due to potential service disruption. [Consolidated Campaign: 5 correlated asset hits merged into this response]

-> Isolate Host on [learning-digitech.vercel.app]

Risk Reduction: -49% Approval: YES

- * Disconnect host from all internal and external networks.
- * For Cloud/Web assets: Suspend deployment or enable 'Maintenance Mode' in console.
- * Scan all other hosts in the same segment for persistence.

6. TOOL 5 - REMEDIATION PACKAGE

Script File:

PredictPath_Remediation_20260313_193216.ps1

Tactical_Remediation_Guideline_20260313_193216.md

Relaxing (Adapting)

8. KEY SECURITY TAKEAWAYS

1. LOG ANALYSIS: 'zap_report_20260206-123234.json' yielded 26 events. 0 high/critical severity detected.
2. ATTACK TECHNIQUES: 1 MITRE ATT&CK technique(s) identified - T1190.
3. CVE INTELLIGENCE: 0 CVE identifier(s) observed from the VulnIntel database.
4. SESSION ANALYSIS: 5 session(s) reconstructed by Tool 2. 5 trajectory forecast(s) by Tool 3.
5. RESPONSE ACTIONS: 1 targeted action(s) issued. Actions: Isolate Host.
6. REMEDIATION: Script 'PredictPath_Remediation_20260313_193216.ps1' generated - 1 action(s), 1 require approval.
7. TRUST STATE: 'Relaxing (Adapting)' - success streak 17, containment at 40.0%.
